

**IMPORTANT INFORMATION, PLEASE NOTE:**

- Please complete a **survey tool** for your country.
- Data is requested for **calendar years**, not fiscal years.
- Data is requested in **US\$**.
- Please provide source information – ideally weblinks or references to published documents – in the “Answers and additional information” column.
- Most of the tool is locked for editing. You can only input data into the information cells – highlighted in green.
- Some cells have drop-down menus – click to select the most appropriate option.
- Please send completed tools to [ihpresults2010survey@human-scale.net](mailto:ihpresults2010survey@human-scale.net)

**How do the questions collect information on the agreed Standard Performance Measures (SPMs)?**

There are usually two questions for each SPM<sup>1</sup>. The first question gathers data on the numerator, and the second for the denominator. In total there are 20 questions for Development Partners (DPs) and 26 for IHP+ Governments. These main questions are supplemented by a limited number of additional questions (see: ‘Supplementary Questions’) to provide more contextual understanding and to provide explanations. Answers to these questions will be used in the IHP+Results 2010 report.

**Where do the targets come from?**

Both, SPMs and their respective targets were agreed by the IHP+ Working Group on Mutual Accountability and ratified by the SURG in July 2010. These reflect the [Paris Indicator targets](#) as far as possible. We have included the targets in the survey tool so you can reflect on your progress in the “Answers and additional information” column.

An IHP+ Compact or equivalent mutual agreement is in place	1	Is there an <b>IHP+ Country Compact</b> (or equivalent agreement) in place?	2007	No	2009	Yes	<If yes, please provide details of the Compact or equivalent, including its title and the period which it covers. <If not, please explain why, including your efforts in leading on the creation of such an agreement in the future.	For example: An IHP+ Compact was signed on 5 April 2008 covering the period up to March 2011. The Compact has been signed by 12 out of 15 DPs in present in Burundi. [Please provide details of the data source and weblink where possible.]

**Why are some words highlighted in red?**

Words highlighted in red are considered to be key terms. It is really important for these terms to be standardised and interpreted in the same way by all respondents, so that the data submitted can be compared. We have provided interpretation notes for these key terms in the accompanying definitions document<sup>2</sup>, drawing on OECD/DAC definitions as much as possible.

### What should I put in the Baseline Data?

For those targets that are taken from the Paris Declaration, the baseline data should be from calendar year 2005<sup>3</sup>. Where the baseline year is fixed in this way, we have made it clear in the survey tool. For all other questions, baseline data should be taken from calendar year 2007 when IHP+ was initiated.

### What if I cannot provide Baseline Data?

Please try to provide data for the requested year. If you have only data covering one year, e.g. 2009, please use the additional space provided to explain your future plans in continuing this data collection.

### What if I cannot provide any information for certain indicators?

If your agency has not collected this data in the past, please explain the reasons and circumstances, and describe your plans to ensure that this data is collected in future years.

### What information should I put into the 'Latest data' column?

This data should be from calendar year 2009. See previous question if this data is not available.

### What is the 'Answers and additional information' column for?

This space is for you to answer the Supplementary Questions and to provide any additional information about how you are taking action in any given area, including in IHP+ countries that have not opted into 2010 monitoring. It provides a space for you to provide further detail on the actions you are taking to implement your IHP+ commitments, to highlight key work, or if necessary to describe factors that may have affected your progress. We will summarise this information on the back of your Partner Scorecard. We would also be grateful if you would provide source information in this column – either weblinks or document titles – to enable us a degree of triangulation.

### What currency should I use for anything used to record Official Development Assistance (ODA)?

All currency data should be reported in US\$. Average annual exchange rates covering past years are included in the table below:

<sup>3</sup> The Paris Declaration was signed in 2005, and it is therefore appropriate that we track progress from this point (as opposed to 2007, which would give less time for targets to be reached).

Please multiply your currency by the appropriate figures in the tables below.
